La Fenice Home

Il gres porcellanato ha **allargato** le proprie **frontiere applicative**, non essendo più utilizzato solo come superficie da rivestimento ma anche come **materiale di finitura** per la realizzazione di oggetti destinati agli **arredi** di differenti ambienti domestici e contract: **lavabi**, **tavoli**, complementi in genere. Arrivando a poter ottenere addirittura un **full fit out** degli spazi, attraverso l'adozione degli **stessi** prodotti ceramici **coordinati** fra pose a **pavimento**, **parete** e **piani** dei **mobili** d'arredo. Siamo all'inizio di una **nuova era** nell'uso del porcellanato, percorribile però solo grazie a continui **investimenti in ricerca**, produzione e promozione e solo grazie ad una conseguente e continua **evoluzione del know-how** ceramico. E La Fenice ha deciso di **intraprendere** questa strada, nel segno della **propria missione** votata sempre all'**innovazione** e alla **qualità** di prodotti e **servizi**, per i propri clienti.

Porcelain stoneware has broadened its application frontiers, no longer being used only as a covering surface but also as a finishing material for the creation of objects intended for the supply of different domestic and contract environments: sinks, tables, accessories in general.

Even being able to obtain a full fit out of the spaces, through the adoption of the same ceramic products coordinated between installations on the floor, wall and furniture tops. We are at the beginning of a new era in the use of porcelain, which can only be achieved thanks to continuous investments in research, production and promotion and only thanks to a consequent and continuous evolution of ceramic know-how.
